Datasheet: 12004158

**Description:**
GOAT ANTI-MOUSE IgG StarBright™ Blue 700

**Specificity:**  
IgG

**Format:**  
StarBright Blue 700

**Product Type:**  
Polyclonal Antibody

**Isotype:**  
Polyclonal IgG

**Quantity:**  
400 µl

### Product Details

#### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

#### Target Species

Mouse

#### Product Form

Purified IgG conjugated to StarBright Blue 700 - lyophilized

#### Reconstitution

Resuspend contents of the tube in the indicated volume of distilled or deionized water and leave on ice for at least 30 min prior to use. Brief centrifugation (pulse spin for 2-3 sec at max speed in a tabletop microcentrifuge) may be used to collect the contents at the bottom of the tube. Do not centrifuge more than 10 sec.

#### Max Ex/Em

#### Antiserum Preparation

Antiserum to Mouse IgG was raised by repeated immunisation of Goats with highly purified antigen.

#### Buffer Solution

Phosphate buffered saline

#### Preservative Stabilisers

- >80% Sucrose
- <1% Polyethylene Glycol
- <0.04% 2-Methyl-2H-Isothiazol-3-One
- <10% Bovine Serum Albumin

#### Product Information

StarBright Blue 700 Secondary Antibodies are ideal for fluorescent western blotting — either for the detection of a single target protein or for multiplex detection of several proteins on one blot,
without stripping and reprobing. The StarBright Fluorophore is composed of a condensed polymer made up of multiple light-absorbing and -emitting monomers which provides an exceptionally bright signal (high quantum yield) compared to most traditional fluorophores.

StarBright Blue 700 Fluorescent Secondary Antibodies can be used with traditional fluorophores like the DyLight 800 Fluorophore for multiplexing. In addition, StarBright Antibodies can be used with Bio-Rad's stain-free technology and/or the hFAB™ Rhodamine Anti-Housekeeping Primary Antibodies for protein normalization. These antibodies are optimized for use with the ChemiDoc™ MP Imaging System, permitting detection of up to three proteins in a single blot.

**Features and Benefits**

**Easy multiplexing** — StarBright Secondary Antibodies can be used with IRDye 800 or other common fluorophores to detect multiple proteins on the same blot

**Short exposure time** — the exceptional brightness of the StarBright Fluorophore leads to shorter exposure times compared to traditional fluorescent dyes: seconds vs. minutes

**High signal-to-noise ratio** — StarBright Secondary Antibodies emit in the red/far red, where there is minimal background (Ex\text{max}/Em\text{max} = 470 nm/700 nm)

**Low nonspecific binding** — StarBright Fluorophore is conjugated to highly cross-adsorbed antibodies

Goat Anti-Mouse IgG StarBright Blue 700 has been cross-adsorbed against bovine, goat, human, rabbit and rat.

**Western Blotting**

StarBright Blue 700 Secondary Antibodies can be used for multiplex fluorescent western blotting with the right combination of fluorophores. These fluorescent secondary antibodies can also be used to detect post-translational modifications like phosphorylation of a target protein.

**Note:** StarBright Antibodies are not suitable for stripping and reprobing.

**Instructions For Use**

**Storage**

1 year at -20°C lyophilized; 6 months at +4°C after resuspension. This product is photosensitive and should be protected from light

**DO NOT FREEZE** the solubilized material

**Shelf Life**

Please see label for expiry date

**Health And Safety Information**

**Regulatory**

For research purposes only
