

## Datasheet: AHP1019G

<b>Description:</b>	RABBIT ANTI HUMAN CD283
<b>Specificity:</b>	CD283
<b>Other names:</b>	TLR3
<b>Format:</b>	Purified
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	50 µg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			1.0 - 2.0ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Human
<b>Species Cross Reactivity</b>	Reacts with: Mouse <b>N.B.</b> Antibody reactivity and working conditions may vary between species.
<b>Product Form</b>	Purified IgG - liquid
<b>Antiserum Preparation</b>	Antisera to human CD283 were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG was prepared by ion exchange chromatography.
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide (NaN <sub>3</sub> )
<b>Approx. Protein Concentrations</b>	IgG concentration 1.0mg/ml
<b>Immunogen</b>	Synthetic peptide corresponding to a 15 amino acid sequence located near human CD283 carboxy-

terminus.

**Specificity**

**Rabbit anti Human CD283 antibody** recognizes human CD283, otherwise known as toll receptor 3, a 103.8 kDa member of the evolutionarily conserved toll-like receptor family (TLRs), expressed at high levels in the placenta and pancreas and also expressed by dendritic cells.

TLRs play an important role in the recognition of invading microbial pathogens during innate immunity, acting through adaptor molecules such as MyD88 and TRAF6. CD283 acts via a cytokine signaling pathway to induce the activation of NF-kappaB and type I interferons, and has been shown to recognize double-stranded viral RNA, including that of the Influenza A and West Nile virus.

Rabbit anti Human CD283 antibody has been shown as suitable for use in IHC on EL4 cytopins at 1ug/ml.

---

**Western Blotting**

AHP1019G detects a band of approximately 103.8kDa in human Daudi cell lysates.

**Storage**

Store at +4°C or at -20°C if preferred.  
Storage in frost-free freezers is not recommended.  
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

---

**Shelf Life**

18 months from date of despatch.
