

Datasheet: AHP1212

Description:	GOAT ANTI HUMAN TNF ALPHA
Specificity:	TNF ALPHA
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			■	
Immunohistology - Frozen			■	
Immunohistology - Paraffin (1)	■			2.5 - 5.0ug/ml
ELISA	■			0.25 - 1.0ug/ml
Immunoprecipitation			■	
Western Blotting	■			0.1 - 0.2ug/ml
Functional Assays	■			0.012 - 0.014ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product heat-mediated antigen retrieval prior to staining paraffin sections. Citrate buffer, pH6.0, is recommended for this purpose.

Target Species	Human
Product Form	Purified IgG - lyophilised
Reconstitution	Reconstitute with 0.1ml distilled water. For long term storage the addition of 0.09% sodium azide is recommended. NB: For functional studies do not add azide.
Antiserum Preparation	Antisera to human TNF α were raised by repeated immunisations of goats with highly purified antigen. Purified IgG prepared by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Approx. Protein Concentrations	IgG concentration 1.0mg/ml after reconstitution

Immunogen	Recombinant human TNFα
External Database Links	UniProt: P01375 Related reagents Entrez Gene: 7124 TNF Related reagents
Synonyms	TNFA, TNFSF2
Specificity	Goat anti Human TNF alpha antibody recognizes human Tumour Necrosis Factor alpha (TNF-α), a 17.4kDa multi-functional pro-inflammatory cytokine primarily secreted by macrophages, but also produced by T and B lymphocytes, activated monocytes and fibroblasts. TNF-α exists in both a transmembrane and mature soluble form and has many biological properties, including activation of transcription factor NF-κB, the induction of apoptosis in various tumour cell lines and the stimulation of cell differentiation and proliferation under certain conditions. TNF-α also plays a role in inflammation, septic shock, autoimmune disease and rheumatoid arthritis.
ELISA	This purified human TNF α antibody may be used in an indirect ELISA or as the capture reagent in a sandwich ELISA with our biotinylated TNFα antibody (AHP1212B) as the detection reagent and recombinant human TNFα (PHP051) as the standard
Histology Positive Control Tissue	Human Breast Carcinoma
References	1. van Horssen, R. <i>et al.</i> (2006) TNF- α in cancer treatment: Molecular insights, antitumor effects, and clinical utility. Oncologist. 11: 397-408.
Storage	Prior to reconstitution store at +4°C. After reconstitution store at -20°C. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Shelf Life	12 months from date of reconstitution.
Health And Safety Information	Material Safety Datasheet Documentation #10162 available at: https://www.bio-rad-antibodies.com/uploads/MSDS/10162.pdf
Regulatory	For research purposes only
