

Datasheet: AHP1486

Description:	RABBIT ANTI CARABIN (N-TERMINAL)
Specificity:	CARABIN (N-TERMINAL)
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			■	
Immunohistology - Frozen			■	
Immunohistology - Paraffin (1)	■			
ELISA			■	
Immunoprecipitation			■	
Western Blotting	■			1 - 2ug/ml
Functional Assays			■	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Antiserum Preparation	Antiserum to human Carabin was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.02% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0mg/ml

Immunogen	A 17 amino acid peptide from near the amino terminus of human Carabin.
External Database Links	UniProt: Q8IV04 Related reagents Entrez Gene: 374403 TBC1D10C Related reagents
Specificity	Rabbit anti Human Carabin antibody recognizes the N-terminal region of human Carabin, also known as TBC1 domain family member 10C (TBC1D10C), a 50 kDa protein belonging to the TBC1 domain family of proteins. Carabin differs from other members of the TBC1 domain protein family, which appear to play a role in the regulation of cell growth and differentiation. Studies demonstrate that Carabin is part of a negative regulatory loop for the intracellular TCR signaling pathway and acts as an inhibitor of the Ras signaling pathway. Carabin is also believed to mediate crosstalk between calcineurin and Ras. Carabin is most abundantly expressed in spleen and peripheral blood leucocytes. Rabbit anti Human Carabin antibody (AHP1486) does not cross react with either TBC1D10A or TBC1D10B.
Western Blotting	AHP1486 detects a band of approximately 55kDa in human spleen tissue cell lysates.

Storage	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Shelf Life	18 months from date of despatch.
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: 10040: https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf
Regulatory	For research purposes only
