

Datasheet: AHP1453

Description:	RABBIT ANTI HUMAN E2F1
Specificity:	E2F1
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin (1)	▪			10ug/ml
ELISA	▪			1/20000 - 1/100000
Immunoprecipitation			▪	
Western Blotting	▪			1/250 - 1/2000
Functional Assays			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Human
Product Form	Purified IgG - liquid
Antiserum Preparation	Antiserum to human E2F1 was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.01% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 0.8 mg/ml
Immunogen	Synthetic peptide corresponding to amino acid sequence 360-369 of Human E2F-1.

Specificity

Rabbit anti Human E2F1 antibody recognises human E2F1 a ~47 kDa nuclear transcription protein. E2F1 is a transcription activator that binds DNA cooperatively with the differentiation regulated transcription factor proteins (DP). Together they bind to the promoter region of a number of genes whose products are involved in cell cycle regulation or DNA replication. E2F1 also binds to the retinoblastoma protein (RB1), which functions in the control of cell-cycle progression from G1 to S phase.

E2F1 can mediate p53-dependent and independent apoptosis. It is a target of the transforming proteins of small DNA tumour viruses and increased expression of this protein has been reported in a variety of cancers.

**Histology Positive
Control Tissue**

Breast carcinoma

Storage

Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Shelf Life

18 months from date of despatch.
