

Datasheet: AHP2629

Description:	RABBIT ANTI HEAT SHOCK PROTEIN 27 (pSer78)
Specificity:	HEAT SHOCK PROTEIN 27 (pSer78)
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Paraffin	▪			1/50 - 1/100
Western Blotting	▪			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid

Antiserum Preparation Antiserum to heat shock protein 27 (pSer78) was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

Buffer Solution	Phosphate buffered saline
Preservative	0.02% Sodium Azide
Stabilisers	50% Glycerol

Immunogen Phospho specific-peptide corresponding to residues surrounding serine 78 of human heat shock protein 27

Synonyms HSP27, HSP28

Specificity Rabbit anti heat shock protein 27 (pSer78) antibody recognizes heat shock protein 27 when

phosphorylated at serine 78. Heat shock protein 27 is a molecular chaperone protein. HSP27 exerts an anti-apoptotic effect via inhibition of the cytochrome-c/procaspase-9 pathway. Phosphorylation of HSP27 at serine 78 is via the p38 MAPK pathway. Phosphorylation of HSP27 at serine 78 contributes to significant alterations in the protein structure and protein-protein interactions of HSP27.

Western Blotting	Due to the presence of phosphoproteins in milk, the use of milk based blocking reagents is not recommended. 1% BSA in PBS or TBS Tween should be used instead.
-------------------------	--

Storage	Store at -20°C Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
----------------	--

Shelf Life	12 months from date of despatch
-------------------	---------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10049 available at: 10049: https://www.bio-rad-antibodies.com/uploads/MSDS/10049.pdf
--------------------------------------	--

Regulatory	For research purposes only
