

Datasheet: AHP669

Description:	RABBIT ANTI GAP43
Specificity:	GAP43
Format:	Serum
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 ml

# **Product Details**

## **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="https://www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			•	
Immunohistology - Frozen	•			
Immunohistology - Paraffin	•			
ELISA			•	
Immunoprecipitation	-			
Western Blotting	-			1/500 - 1/1000
Immunofluorescence				

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Cat
Species Cross Reactivity	Reacts with: Human, Rat, Monkey, Mouse  N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Serum - liquid

Antiserum Preparation Antisera to GAP43 were raised by repeated immunisations of rabbits with highly purified antigen.

Antiserum i reparation Antiscra to OAI 45 were raised by repeated infinitinisations of rabbits				
Preservative Stabilisers	0.02% Sodium Azide (NaN <sub>3</sub> )			
Immunogen	Purified GAP43 from cat brain.

### **Specificity**

**Rabbit anti GAP43 antibody** recognises the protein designated GAP43, a neuronal protein that is expressed at elevated levels during development and also during regenerative axon growth.

GAP43 (also known as neuromodulin, pp46, B-50, Protein F1 and calmodulin-binding protein P-57) is a protein of approximately 25 kDa that migrates on SDS-PAGE gels with an apparent size of 40-50 kDa. The aberrant migration is due to the unusually low abundance of hydrophobic amino acid residues. GAP43 is found tightly associated with neuronal membranes due to palmitoylation. The solubilised protein binds calmodulin, although this is reduced following protein kinase C phosphorylation of GAP43.

# Storage

Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

# Shelf Life 18 months from date of despatch. Health And Safety Information Material Safety Datasheet documentation #10081 available at: 10081: <a href="https://www.bio-rad-antibodies.com/uploads/MSDS/10081.pdf">https://www.bio-rad-antibodies.com/uploads/MSDS/10081.pdf</a> Regulatory For research purposes only
