

Datasheet: BUF050D

Description:	TC-PROTECTOR CELL FREEZING MEDIUM
Name:	CELL FREEZING MEDIUM
Format:	Ready To Use
Product Type:	Accessory Reagent
Quantity:	1 x 10ml

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol						
	recommendations, please v	risit <u>www.b</u> Yes	<u>io-rad-antit</u> No	odies.com/protocols. Not Determined	Suggested Dilution		
	Tissue Culture	•					
	Where this product has not been tested for use in a particular technique this does not neces exclude its use in such procedures. Suggested working dilutions are given as a guide only. I recommended that the user titrates the product for use in their own system using appropriat negative/positive controls.						
Product Form	Cell freezing media - liquid						
Preparation	Chemically defined cryo-pre (bovine serum albumin).	eservation	medium. D	ooes not contain FBS (fo	etal bovine serum) or BSA		
Product Information	TC-Protector cell freezing medium is a ready-to-use optimised cryo-preservation medium which allows for the direct freezing of an expansive range of mammalian cell lines at -80°C.						
	TC-Protector cell freezing medium provides a no-mess solution for the protection of cells during frozen storage, and reliably gives a high cell viability and durability rate on thawing.						
Instructions For Use	1. Centrifuge cells pre-suspended in complete growth medium at 1,000-1,500rpm for 60 seconds.						
	2. Remove supernatant and resuspend cells in TC-Protector at a concentration of 5x10 ⁶ to 1x10 ⁷ cells/mL.						
	3. Transfer this cell suspension to cryogenic storage vial.						
	4. Freeze vial at -80°C (liquid nitrogen should be used for long-term storage).						

References	1. Takebe, T. <i>et al.</i> (2014) Transient vascularization of transplanted human adult-derived progenitors promotes self-organizing cartilage. <u>J Clin Invest. 124 (10): 4325-34.</u>
Storage	Store unused product at +4°C.
