

## Datasheet: MCA1054PE

|                      |                           |
|----------------------|---------------------------|
| <b>Description:</b>  | MOUSE ANTI HUMAN CD59:RPE |
| <b>Specificity:</b>  | CD59                      |
| <b>Other names:</b>  | HRF, PROTECTIN            |
| <b>Format:</b>       | RPE                       |
| <b>Product Type:</b> | Monoclonal Antibody       |
| <b>Clone:</b>        | MEM-43                    |
| <b>Isotype:</b>      | IgG2a                     |
| <b>Quantity:</b>     | 100 TESTS                 |

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

|                | Yes | No | Not Determined | Suggested Dilution |
|----------------|-----|----|----------------|--------------------|
| Flow Cytometry | ■   |    |                | Neat               |

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

|                         |                                                                     |                      |                   |
|-------------------------|---------------------------------------------------------------------|----------------------|-------------------|
| Target Species          | Human                                                               |                      |                   |
| Product Form            | Purified IgG conjugated to R. Phycoerythrin (RPE) - lyophilized     |                      |                   |
| Reconstitution          | Reconstitute with 1.0 ml distilled water                            |                      |                   |
| Max Ex/Em               | Fluorophore                                                         | Excitation Max (nm)  | Emission Max (nm) |
|                         | RPE 488nm laser                                                     | 496                  | 578               |
| Preparation             | Purified IgG prepared by affinity chromatography on Protein A       |                      |                   |
| Buffer Solution         | Phosphate buffered saline                                           |                      |                   |
| Preservative            | 0.09% Sodium Azide                                                  |                      |                   |
| Stabilisers             | 1%                                                                  | Bovine Serum Albumin |                   |
|                         | 5%                                                                  | Sucrose              |                   |
| Immunogen               | Thymocytes and T lymphocytes.                                       |                      |                   |

| <b>Specificity</b>    | <p><b>Mouse anti Human CD59 antibody, clone MEM-43</b> recognizes CD59, a glycosyl-phosphatidylinositol (GPI) anchored membrane protein also known as membrane attack complex inhibition factor. CD59 blocks the formation of the complement membrane attack complex (MAC) by binding of C8a and C9. CD59 is found on all types of leucocytes including platelets and is also expressed on many non-haematopoietic cells.</p> <p>The epitope recognized by Mouse anti Human CD59 antibody, clone MEM-43 is lost after reduction therefore, non-reducing conditions are required for western blotting techniques.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
