Datasheet: MCA1817

Description:	MOUSE ANTI HUMAN CD8
Specificity:	CD8
Format:	S/N
Product Type:	Monoclonal Antibody
Clone:	4B11
Isotype:	IgG2b
Quantity:	1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			1/50
Immunohistology - Paraffin (1)	▪			1/50
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			1/25

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

(1)**This product requires antigen retrieval using heat treatment prior to staining of paraffin sections.**

Tris/EDTA buffer pH 8.0 is recommended for this purpose.

Target Species

Human

Product Form

Tissue Culture Supernatant - liquid

Preservative Stabilisers

0.09% Sodium Azide

Immunogen

Synthetic peptide derived from the carboxy terminal region of the humanCD8 alpha chain coupled to a N-terminal cysteine, with the sequence C-KSDGKPSLSARYV. The peptide was coupled to bovine serum albuman and keyhole limpet hemocyanin.

Synonyms	CD8B1, MAL
Fusion Partners	Spleen cells from immunised mice were fused with cells of a mouse p3-NS1-Ag4-1 myeloma cell line.
Specificity	**Mouse anti Human CD8 antibody, clone 4B11** recognizes the human CD8 cell surface antigen, a ~32 kDa glycoprotein expressed by the cytotoxic/suppressor subset of T-cells and weakly by NK cells. Mouse anti Human CD8 antibody, clone 4B11 was raised based on an earlier successful strategy used to generate rabbit polyclonal antibodies against human CD8 employing the same immunizing peptide (Mason *et al.* 1992). Mouse anti Human CD8 antibody, clone 4B11 has been reported as being suitable for use in Western blotting (Williamson *et al.* 1998) .
