

## Datasheet: MCA1846A488T

Description:	HAMSTER ANTI MOUSE CD81:Alexa Fluor® 488
Specificity:	CD81
Other names:	TAPA-1
Format:	ALEXA FLUOR® 488
Product Type:	Monoclonal Antibody
Clone:	Eat2
lsotype:	lgG1
Quantity:	25 TESTS/0.25ml

## **Product Details**

Applications	from testing within our	laboratories, peer-	reviewed	publications or persor	s information is derived nal communications from n. For general protocol
	recommendations, ple	ase visit <u>www.bio-r</u>	ad-antibo	dies.com/protocols.	
		Yes	No	Not Determined	Suggested Dilution
	Flow Cytometry				Neat
	-				e this does not necessarily
	exclude its use in suc	h procedures. It is r	recomme	nded that the user titra	ates the antibody for use in
	their own system usin	g appropriate nega	tive/positi	ve controls.	
Target Species	Mouse				
Species Cross	Reacts with: Rat				
Reactivity	N.B. Antibody reactivi	ty and working con	ditions m	ay vary between speci	es.
Product Form	Purified IgG conjugate	ed to Alexa Fluor®	488 - liqu	id	
Max Ex/Em	Fluorophore	Excitation Max (nm	n) Emiss	sion Max (nm)	
	Alexa Fluor®488	495		519	
Preparation	Purified IgG prepared	by affinity chromate	ography o	on Protein G from tissu	le culture supernatant
Buffer Solution	Phosphate buffered sa	aline			
Preservative	0.09% Sodium Azide				
Stabilisers	1% Bovine Serum	Albumin			
Approx. Protein Concentrations	IgG concentration 0.0	5 mg/ml			
Immunogen	38C13, murine B cell	line.			
External Database Links	UniProt:				

P35762 Related reagents

	Entrez Gene: <u>12520</u> Cd81 <u>Related reagents</u>
Synonyms	Tapa1
Fusion Partners	Spleen cells from immunised Armenian hamsters were fused with cells of the mouse PX3-Ag.8.653 myeloma cell line.
Specificity	Hamster anti Mouse CD81 antibody, clone Eat2 recognizes mouse and rat CD81, also known as TAPA-1 or Target of the antiproliferative antibody 1. CD81 is a 236 amino acid ~26 kDa multipass transmembrane protein belonging to the TM4SF family ( <u>UniProt: P35762</u> ). In rodents CD81 is expressed at much higher levels on resting B cells than on T cells, although increased expression on T cells is found following activation. Hamster anti Mouse CD81 antibody, clone Eat2 induces homotypic aggregation of B cells and inhibits anti Ig and IL-4 induced proliferation ( <u>Maecker <i>et al.</i></u> 2000). Eat 2 requires the presence of both extracellular loops of TAPA-1 for binding.
	Mice lacking CD81 demonstrate reduced fertility through impaired oocyte-sperm fusion, double knockout CD81-/- CD9-/- mice are completely infertile suggesting complimentary roles in oocyte-sperm fusion (Rubenstein et al. 2006).
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul.
	The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity Fc receptors. This may be reduced by using SeroBlock FcR (

Storage		Store at +4°C or at -20°C if preferred.
		This product should be stored undiluted.
		Storage in frost free freezers is not recommended. This product is photosensitive and should be protected from light.
		Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Shelf Life	)	18 months from date of despatch.
