Datasheet: MCA1974GA

**Description:** MOUSE ANTI HUMAN ESTROGEN RECEPTOR BETA 1

**Specificity:** ESTROGEN RECEPTOR BETA 1

**Format:** Purified

**Product Type:** Monoclonal Antibody

**Clone:** PPG5/10

**Isotype:** IgG2a

**Quantity:** 0.1 mg

---

**Product Details**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) **This product requires antigen retrieval using heat treatment prior to staining of paraffin sections;**

0.05M glycine/EDTA pH 8.0 see [See Carpino et al.](#) or sodium citrate buffer pH 6.0 are recommended for this purpose.

---

**Target Species**

Human

**Species Cross Reactivity**

Reacts with: Primate, New World primate, Llama, Rat, Marmoset, Pig, Sheep, Cynomolgus monkey, Rhesus Monkey, Turtle, Goose

**N.B.** Antibody reactivity and working conditions may vary between species.

**Product Form**

Purified IgG - liquid

**Buffer Solution**

Phosphate buffered saline

**Preservative Stabilisers**

0.09% Sodium Azide

**Approx. Protein Concentrations**

IgG concentration 1.0 mg/ml
**Immunogen**

Synthetic peptide sequence CSPADESKSKEGSQNPQSQ from the C-terminal region of the human estrogen receptor beta 1 isoform.

**Synonyms**

ESTRB, NR3A2

**Fusion Partners**

Spleen cells from immunised BALB/c mice were fused with cells of the mouse SP2/0 myeloma cell line.

**Specificity**

Mouse anti Human estrogen receptor beta 1, clone PPG5/10 recognizes the estrogen receptor beta 1 (ERB1), one of several isoforms of estrogen receptor (ER) which can be used in conjunction with progesterone receptor (PR) and HER2/neu (CD340), to help determine both prognosis and the effectiveness of hormonal therapy, in breast cancer patients. Prognosis and survival rate varies greatly depending on cancer type, stage and treatment.

Mouse anti Human estrogen receptor beta 1, clone PPG5/10 is increasingly being utilized in the immunohistochemical staining of formal fixed paraffin embedded tissue, in preference to ligand binding assays, for the detection of ER/PR. ER/PR is present in approximately 75% to 80% of breast tumors, and breast cancer cells with these receptors depend on the hormones estrogen and/or progesterone to grow (Saunders, P. et al., 2002 and Nelson, A.W. et al., 2017).

Mouse anti Human estrogen receptor beta 1, clone PPG5/10 can be used to demonstrate the nuclear presence of ERB1 within cells of the breast (Shaaban, A.M. et al., 2008), ovary, uterus, oviduct, testis, prostate, bladder and male reproductive ducts.

**BE ADVISED:** Publications (Nelson, A.W. et al., 2017 and Andersson, S. et al., 2017) have queried the validity of clone PPG5/10. Please refer to the references section of this product's web page or datasheet for further information.

**Histology Positive Control Tissue**

Ovary or breast carcinoma

**References**

adenocarcinoma. Prostate. 54: 79-87.

Further Reading

Storage
Store at +4°C or at -20°C if preferred.
This product should be stored undiluted.

Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Shelf Life 18 months from date of despatch

Regulatory For research purposes only
