**Datasheet: MCA2311PE**

**Product Details**

**Description:** MOUSE ANTI PIG CD163:RPE  
**Specificity:** CD163  
**Format:** RPE  
**Product Type:** Monoclonal Antibody  
**Clone:** 2A10/11  
**Isotype:** IgG1  
**Quantity:** 100 TESTS

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

**Target Species**  
Pig

**Product Form**  
Purified IgG conjugated to R. Phycoerythrin (RPE) - lyophilized

**Reconstitution**  
Reconstitute with 1.0ml distilled water

**Preparation**  
Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant

**Buffer Solution**  
Phosphate buffered saline

**Preservative Stabilisers**  
- 0.09% Sodium Azide  
- 1% Bovine Serum Albumin  
- 5% Sucrose

**Immunogen**  
Porcine alveolar macrophages.

Fusion Partners

Spleen cells from immunised BALB/c mice were fused with cells of the X63-Ag.8.653 myeloma cell line.

Specificity

**Mouse anti Pig CD163 antibody, clone 2A10/11** recognises porcine CD163, a 120 kDa single pass type 1 transmembrane cell surface glycoprotein expressed on cells of the monocyte/macrophage lineage. The expression levels of CD163 vary during the course of macrophage differentiation. The highest levels of CD163 expression are found on tissue macrophages but bone marrow derived cells are CD163 negative. Expression of CD163 on peripheral blood monocytes varies between about 5% and 50% depending on the donor (Sanchez et al. 1999).

Mouse anti Pig CD163, clone 2A10/11 is reported to inhibit both African swine fever infection and viral particle binding to alveolar macrophages in a dose-dependent manner (Sanchez-Torres et al. 2003).

Flow Cytometry

Use 10ul of the suggested working dilution to 1x10^6 cells in 100ul.

**Storage**

Store at +4°C. DO NOT FREEZE.
This product should be stored undiluted. This product is photosensitive and should be protected from light. Should this product contain a precipitate we recommend microcentrifugation before use.

**Shelf Life**

12 months from date of despatch.

**Health And Safety Information**

Material Safety Datasheet documentation available at:
