

Datasheet: MCA5434Z

Description:	MOUSE ANTI HUMAN INDOLEAMINE 2,3-DIOXYGENASE:Preservative Free
Specificity:	INDOLEAMINE 2,3-DIOXYGENASE
Other names:	IDO
Format:	Preservative Free
Product Type:	Monoclonal Antibody
Clone:	4F9
Isotype:	IgG2a
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	■			0.1 - 10 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Approx. Protein Concentrations	Ig concentration 0.5 mg/ml
Immunogen	Recombinant protein corresponding to aa 304-403 of human Indoleamine 2,3-dioxygenase.
External Database Links	<p>UniProt: P14902 Related reagents</p> <p>Entrez Gene: 3620 IDO1 Related reagents</p>

Synonyms	IDO, INDO
Fusion Partners	Spleen cells from BALB/c mice were fused with cells from the Sp2/0 myeloma cell line.
Specificity	Mouse anti Human indoleamine 2,5-dioxygenase antibody, clone 4F9 recognizes human Indoleamine 2,3-dioxygenase 1, also known as IDO-1. IDO-1 is a 403 amino acid ~50 kDa enzyme involved in tryptophan catabolism. IDO-1 is expressed in lymphoid organ dendritic cells and in some epithelial cells. It is not expressed in most tissues but expression is usually inducible by interferon γ (Taylor and Feng 1991). Mouse anti Human indoleamine 2,5-dioxygenase antibody, clone 4F9 binds to an epitope towards the c-terminal end of human indoleamine 2,5-dioxygenase.
Storage	Store at -20°C only. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Shelf Life	18 months from date of despatch.
Health And Safety Information	Material Safety Datasheet documentation available at: Material Safety Datasheet Documentation #10162 available at: https://www.bio-rad-antibodies.com/uploads/MSDS/10162.pdf
Regulatory	For research purposes only
