

## Datasheet: MCA6021

<b>Description:</b>	MOUSE ANTI NFkB p65
<b>Specificity:</b>	NFkB p65
<b>Other names:</b>	NF-KAPPA-B
<b>Format:</b>	Purified
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	2A12A7
<b>Isotype:</b>	IgG1
<b>Quantity:</b>	50 µg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Paraffin	▪			
Immunoprecipitation	▪			
Western Blotting	▪			1.0 - 4.0 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Human
<b>Species Cross Reactivity</b>	Based on sequence similarity, is expected to react with: Mouse, Rat <b>N.B.</b> Antibody reactivity and working conditions may vary between species.
<b>Product Form</b>	Purified IgG - liquid
<b>Preparation</b>	Purified IgG prepared by affinity chromatography
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide (NaN <sub>3</sub> ) 0.01% Bovine Serum Albumin 50% Glycerol
<b>Approx. Protein Concentrations</b>	IgG concentration 0.2 mg/ml
<b>Immunogen</b>	Synthetic peptide from human NFkB

**Specificity**

**Mouse anti NFkB p65 antibody, clone 2A12A7** recognizes Nuclear factor NF-kappa-B p65 subunit also known as Nuclear factor of kappa light polypeptide gene enhancer in B-cells 3 or RelA. NF-kappa-B p105 and p100 subunits are large precursor proteins that are cleaved by the ubiquitin/proteasome pathway into the mature NF-kappa-B p50 and p52 subunits (NF-kappa-B p105 cleavage results in the p50 unit, while cleavage of NF-kappa-B p100 results in the p52 subunit). Rel protein family members interact with p52 and p50 to form transcription factors. In the absence of stimulation an I-kappa-B protein mediated sequestration mechanism ensures that the transcription factors remain in the cytoplasm. Upon stimulation, I-kappa-B proteins become phosphorylated, which results in their ubiquitylation and subsequent degradation by the 26S proteasome.

The NF-kappa-B pathway plays a critical in mediating immune responses after infection and has been implicated in a variety of diseases ranging from autoimmune disorders to cancer.

---

**Western Blotting**

Mouse anti NFkB p65 antibody recognizes a band of approximately 65 kDa in Jurkat cell lysate

---

**Storage**

Store at -20°C only.

Storage in frost-free freezers is not recommended.

This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

---

**Shelf Life**

12 months from date of despatch
