Datasheet: MCA636GA

Product Details

Description: MOUSE ANTI PIG IgG2

Specificity: IgG2

Format: Purified

Product Type: Monoclonal Antibody

Clone: K68 Ig2

Isotype: IgG1

Quantity: 0.1 mg

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Pig

Product Form

Purified IgG - liquid

Preparation

Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.09% Sodium Azide (NaN₃)

Carrier Free

Yes

Approx. Protein Concentrations

IgG concentration 1.0 mg/ml

Immunogen

Porcine IgG2

Fusion Partners

Spleen cells from immunised mice were fused with cells of the mouse P3-X63-Ag8.653 myeloma.
Specificity

**Mouse anti Pig IgG2, clone K68 Ig2** recognizes porcine IgG2 and shows no cross-reactivity with IgG1, IgA or IgM. IgG2 (IgG2a and IgG2b), along with IgG1, IgG3 and IgG4 comprise the major known subclasses of IgG in swine. Combined, the various subclasses of IgG comprise approximately 85% of immunoglobulin in porcine serum.

Studies using clone K68 Ig2 have demonstrated that along with IFNγ, porcine IgG2 levels are significantly elevated in parasite infections by worm species such as *Schistosoma japonicum* (Tian, F. *et. al.* 2010). With changes in agricultural practices and the emergence of new strains of porcine diseases, it has been suggested that new methods of vaccine development should be investigated. Studies have shown that antibodies recognizing porcine immunoglobulins such as clone K68 Ig2 may have potential use in porcine vaccine development studies (Rodríguez-Calvo, T. *et. al.* 2010).

Clone K68 Ig2 forms part of a range of monoclonal antibodies specific for porcine immunoglobulins and immunoglobulin subclasses that are available from Bio-Rad.

References

**Storage**

Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

**Shelf Life**

18 months from date of despatch

**Health And Safety Information**

**Regulatory**

For research purposes only
